Question (By Capt. Coulson) Do you know why you are here?

Yes, I think so.

Will you give us your full name?

FRITZ EMME.

What is your full name?

FRITZ GUNTHER EMME

Where were you born?

I was born on the 16th March, 1913 in Danzig.

At the time of your birth what citizenship had you?

I had German citizenship.

What is your father's name?

RICHARD EMME.

And your mother's name?

JOYKE EMME - both German citizens.

Where did you receive your education?

I went to school for one year at Danzig and in 1920 our family moved to Berlin where we stayed from 1920 until 1931, I visited the Hidenburg High School, matriculated there in 1931. After that I entered the Technical University at Berlin for Mechanical Engineering. Up to 1935 and in September 1935 I came to China, to Peiping as an exchange student. This was arranged between the two Governments. I attended the Chinhwa National University, where I stayed until 1937 June, from there I went to Shanghai and signed on board a ship "Grete Maerse" as a kitchen helper. I signed off at San Pedro and went to Berkley, California. Came in on a visit with introductory support from Carlowitz. I arrived in the States at the end of July, 1937 and stayed until May 1938. Then signed on a Swedish ship.

What did you do during that year?

I was staying with friends.

Did you have any regular job?

No.

Where did you receive your money?

I had money and did odd jobs. In May I signed on another ship carrying scrap iron and lumber to Japan and on the return trip copra from the Philippines. Made a round trip from California, Japan, Philippines then back to San Francisco then after six years absence from Germany got orders to go home so this suited me nicely. Got home in January, 1939 to Berlin. As soon as I reached Berlin I entered the Technical University as I had not passed my final examination. Prepared for that examination and graduated with diplomas in July 1939. War broke out 1st September. At the end of July and beginning of August made a trip to my father and mother in Danzig. Came back then got a job with Demag Factory at Duisburg. I was called for military service at the end of November or middle of December, 1939. Got my training at Bartenstein in Prussia. I received training for Infantry Signal Corps this was until middle or end of February. Then I got orders from Gestapo Secretary Service. They got me transferred to Berlin and I went into that office and was in Far Eastern Department and got daily telegrams and had to make reports of what was happening there as in Germany we only had German news. Stayed from February to May. In May somebody introduced me to the firm Harry W. HAMACHER. This transport

firm was appointed by the German Government to handle the trans-Siberian shipments from the Far East and vice-versa. I was introduced to this firm and entered it with training for three or four weeks in general shipping matters. They then sent me out to the Far East to supervise the March shipments. Shipments mostly went to Japan.

Were you at that time a member of the German Army?  
I came there and they said I had to go and pass a Medical examination. I was not wearing uniform.

Were you discharged?  
I was discharged before I entered the S.D. All I have is my passport. They did not allow me to take any papers with me.

Were you married at this time?  
No. In the beginning of August I left Berlin in my capacity of Supervisor of Shipping to the Far East and arrived 8th August 1940 in Manchuli having travelled via Siberia. There I worked as a regular shipping clerk on the platform and in the office and stayed there until end of October then went for the same firm to Dairen after a few days stay in Harbin where the Head Office of this firm is situated. In Dairen, during the month of January, 1941, I got in contact with my former friends and was anxious to enter my proper line of profession again so I telegraphed to Berlin to see if they had any objections. It was refused. So on the 31st January I quit on my own from the firm of HAMACHER and entered MELCHERS & CO. on the 1st February and went straight to Tientsin. Since then I have done the usual travelling and business here. First the firm intended to put me in Manchuria to build up their technical business there but this did not work out as very soon the import and export business in Manchuria was very much interrupted so there was no opportunity to build up any technical business there. Travelled to Mukden after this plan was given up so transferred back to Tientsin Melchers staff as a regular member. My activities with Melchers & Co. were: My first big job was rebuilding and supervising big egg powder factory at Peking. Later I was Chief Engineer of the Tientsin Oil Mill at Tientsin.

Did you ever leave China?  
I was in Japan.

When were you in Japan?  
1942. In Japan I visited our office there and because our management had taken up connection with the IUGI (this is an agency of I.G. Technical Aluminium Works, does all kinds of very special work, working out plans for chemical industry and coal mines and steel.

How long did you remain in Japan?  
Stayed two weeks.

Have you made any other visits outside China?  
I stayed in Shanghai in 1937 only ten days or two weeks.

What was the purpose of that visit?  
That was when I finished my term as an exchange student and went to Shanghai for a ship to go home.
